

## 3D Architects

[www.3d-architects.com](http://www.3d-architects.com)

**3D Architects have been providing architectural and design services to commercial, retail and residential developers, private clients, institutional and Enterprise Zone investors, business and manufacturing organisations, educational establishments, enterprise companies and local authorities since its inception in 1989.**

The practice has developed on the basis of reputation and recommendation. Repeat commissioning and referral have been the prime factors in 3D's steady growth in Glasgow, Edinburgh and Manchester.

Digital IP has worked with 3D Architects for over seven years. Originally providing a telephony solution, 3D secured a major public sector contract and required to rapidly expand and improve IT infrastructure across its three locations. Digital IP replaced the Network infrastructure with Microsoft Windows 2003 Server and Microsoft Exchange 2003.

This enabled 3D to have remote access to a VPN (Virtual Private Network) with inbuilt security firewalls to allow employees to receive internet access and email anywhere in the world. Staff can now link to the network through laptops, desktop PCs, PDAs and mobile telephones. Already a preferred supplier Digital IP completed the task in quick time with minimal disruption to business.
